Bibimbite Project Training Material

By Founder Seungwoo Oh

1. Introduction

Who We are?

“Bibimbite is a social venture dedicated to helping single teenage mothers in Kigali, Rwanda to have their opportunity in managing a food truck business, idea created from Korean Bibimbap and tailored to Rwandan culture and recipe. We provide business consulting and foundational training for Rwandan teenage mothers.”

Mission Statement

“Bibimite aims to pave the path of resolving food desert while educating business starters in underserved communities, e.g. Single Mothers”

Brandstory & Concept

- Bibimbite was born from a simple yet powerful idea: food can be a vehicle for change. In Rwanda, many single mothers face financial hardship and limited job opportunities, making it difficult to provide for their families. We saw an opportunity to create something more than just a food business—a platform for empowerment. Through hands-on training and employment in our food truck, we equip single mothers with skills, financial independence, and a supportive community. At Bibimbite, every meal served is a step toward a brighter future, proving that good food can nourish both lives and livelihoods.

Problems : in underserved communities, women especially single women face

- Financial Struggles : high cost of living with combined with childcare fees, lack skill and education in personal finance
- Social Stigma : single mothers are irresponsible, incapable & vulnerable to isolation, anxiety and stress
- Limited Opportunities : 92.97% of women are employed in agriculture or informal sectors in Rwanda, due to limited education and training finding stable professions with flexible working hours is difficult

Target Market

- Locals , who are interested in healthy food
- Expats, who are interested in healthy food and, who are compassionate to support the local single mothers
- Tourists, who would like to have a light , quick healthy food
- Young professionals, who are not only interested in having healthy food, but also share the vision of the project, BibimBitecals , who are interested in healthy food

Initiatives We Take to Teach Rwandan Teenage Single Mothers

- Teach them how to operate the franchised business through a 4 week online training session
- Provide one and one consulting to ensure the stability of the franchised business
- Offer seed money of the business in collaboration with the **Empowerment Fund**

Points of Reminder

“Our purpose is to guide and manage the business consulting while maintaining a fun, Korean Vibe. Not only that, our purpose is to raise prime awareness about the health advantages of Korean cuisine in Rwanda.”

Impacts

- ## Economic Independence of Single Mothers :

  BibimBite tackles food insecurity by operating a mobile bibimbap food truck that brings affordable, nutritious meals directly to underserved communities. With its vibrant mix of vegetables, lean proteins, and grains, the food truck promotes healthier eating habits and cultural inclusivity.

- ## Nutritional Wellness :

  Beyond nourishing the community with affordable, delicious meals, Bibimbite offers nutritional wellness awareness and guidance programs for single mothers and school children to promote better health.

- ## Community Building :

  Bibimbite fosters connection, support, and solidarity among single mothers and the wider community through shared purpose and daily collaboration.

Goals

“ Empowering economic independence of single mothers and nutritional wellness in underserved communities “

1000 + Meals Served

40+ Single Mothers Employed

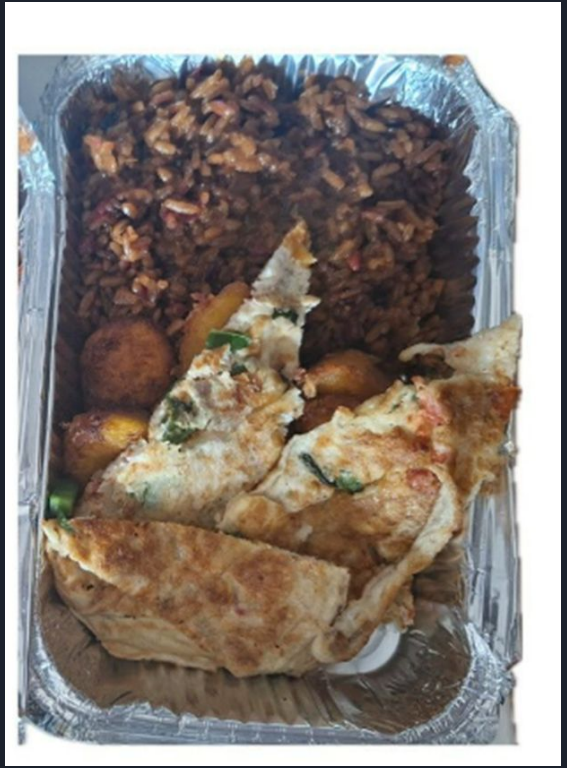

3 Operating Locations

2. Menu Overview

Menu 1 : Curry Comfort Grain Bowl

Key Ingredients:

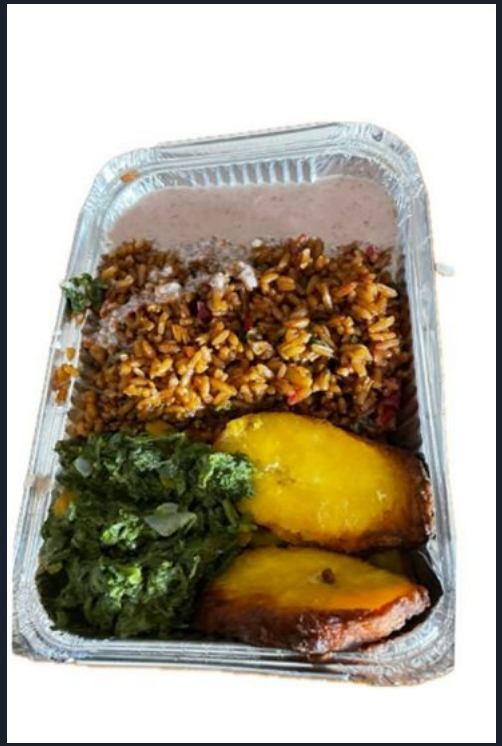

- **White Rice**
- **Curry-spiced Egg**
- **Cabbage Slaw**
- **Pan-fried Plaintains**
- **Soy Glaze Sauce**

Menu 2 : Rooted Veggie Grain Bowl

Key Ingredients:

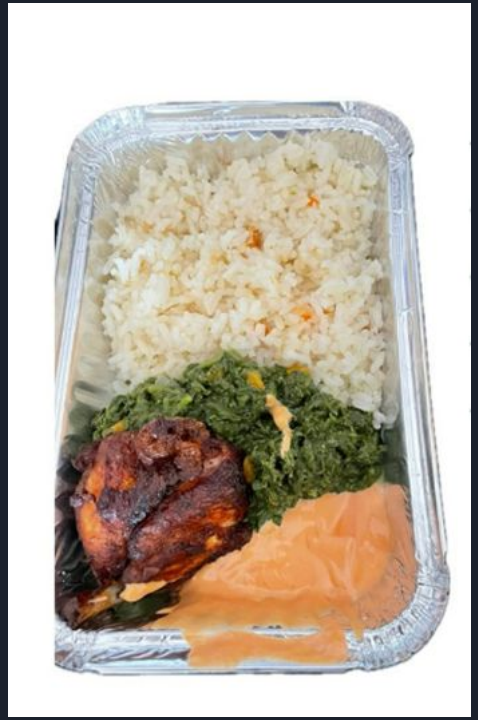

- **Spiced Rice**
- **Hearty Beans**
- **Pan-friend Plantains**
- **Toasted Peanurs**
- **Pickled Onions**
- **Tomato Groundnut Sauce**

Menu 3 : Chicken Corn Mayo Grain Bowl

Key Ingredients:

- **White Rice**
- **House Grilled Chicken**
- **Roasted Root Vegetables**
- **Roasted Corn**
- **Garlic Mayo Sauce**

3. Korean Food Culture - Bibimbap (for local staff)

Cultural Touchpoints between Korea and Rwanda

- Bibimbap is one of the most beloved traditional Korean dishes, with over 500 years of history. It originated as a way to bring together many ingredients into one bowl — especially during harvest festivals or year-end celebrations, when families would use leftover vegetables, meats, and sauces to create a balanced meal.

- Eating customs (mixing Bibimbap, sharing food) : this echoes Rwandan communal eating traditions, where meals often involve shared platters of vegetables, beans, and starches. You can draw a parallel to mixing ingredients at home after a harvest or for community gatherings.

- Bibimbap is a traditional Korean rice bowl that brings together vegetables, proteins, and sauce in perfect harmony. For centuries, it’s been enjoyed by both farmers and royalty. In Rwanda, where meals are also shared with family and friends, we adapt bibimbap using fresh local ingredients — keeping the spirit of harmony and community alive in every bowl.

4. Food Preparation & Cooking Training

Recipe Standardization : Curry Comfort Grain Bowl

Ingredient	Local Sourcing Note	Qty per Portion	Prep Instructions	Storage
White Rice	Local Rwandan rice (Kimironko)	180 g	Wash and cook in rice cooker; keep warm covered.	Hot holding ≤4 hrs
Eggs	Locally farmed eggs	1 egg	Boil or fry eggs, toss in curry spice blend, hold warm or chill.	Refrigerate after cooking
Curry Spice Mix	Local curry powder + garlic	5 g	Mix with oil; coat eggs	Dry store
Cabbage Slaw	Cabbage + carrots	80 g	Shred cabbage and carrots; toss with light vinaigrette just before service.	Refrigerate, 1 day
Plantains	Local sweet plantains	80 g	Slice diagonally, pan-fry until golden; keep warm.	Hot hold
Soy Glaze Sauce	Soy sauce + sugar + garlic + ginger	20 mL	Simmer soy, sugar, garlic, ginger until glossy; refrigerate for up to 1 week	Refrigerate, 1 week

Recipe Standardization : Rooted Veggie Grain Bowl

Ingredient	Local Sourcing Note	Qty per Portion	Prep Instructions	Storage
Spiced Rice	Local Rwandan rice with curry/turmeric	180 g	Rinse rice; cook with turmeric, curry powder, onion, garlic. Keep warm in rice cooker or insulated box.	Hot hold, ≤4 hrs
Hearty Beans	Common beans (red/black)	100 g	Soak overnight, cook until tender with aromatics. Lightly season.	Refrigerate after cooking
Pan-fried Plantains	Ripe local plantains	80 g	Slice diagonally; pan-fry in oil until golden and caramelized.	Hot hold
Toasted Peanuts	Local peanuts	15 g	Toast in dry pan until golden; crush lightly for garnish.	Dry store
Pickled Onions	Red onions, vinegar, sugar	20 g	Slice thin; soak in vinegar, sugar, salt for 1–2 hrs. Chill.	Refrigerate, ≤5 days
Tomato Groundnut Sauce	Tomato, peanut paste, garlic	60 mL	Blend tomatoes, peanut paste, garlic, onion; simmer until thick and nutty. Adjust seasoning.	Refrigerate, ≤5 days

Recipe Standardization : Chicken Corn Mayo Bowl

Ingredient	Local Sourcing Note	Qty per Portion	Prep Instructions	Storage
White Rice	Local Rwandan rice	180 g	Rinse and cook; keep warm in insulated container.	Hot hold ≤4 hrs
House-Grilled Chicken	Local chicken, marinated	100 g	Marinate chicken in garlic, paprika, oil, salt; grill or pan-sear. Chill or hold warm.	Refrigerate cooked ≤2 days
Roasted Root Vegetables	Carrots, sweet potatoes, beets	100 g	Dice; season with oil and spices; roast until tender and golden.	Refrigerate ≤2 days
Roasted Corn	Fresh or frozen corn kernels	50 g	Pan-roast or grill until charred; season lightly.	Refrigerate ≤2 days
Garlic Mayo Sauce	Homemade or commercial mayo + garlic	30 mL	Blend garlic into mayo or make aioli with local eggs/oil; chill.	Refrigerate ≤5 days

5. Workflow for 3 menu

Workflow Management : Curry Comfort Grain Bowl

Step	Role	Station / Task	Action Description	Duration (sec)	Notes
1	Cashier	Order Taking	Take order, mark ticket, process payment	30	Use visible order queue
2	Runner	Veg & Sauce Station	Portion cabbage slaw and drizzle soy glaze in bowl	20	Keep ingredients prepped
3	Cook	Rice & Egg Station	Scoop hot rice; top with curry-spiced egg	25	Eggs prepared in morning
4	Cook	Plantain Station	Add freshly fried plantains	20	Fry in small batches
5	Runner	Final Assembly	Add finishing sauce drizzle & check components	15	Target total ≤ 2 min
6	Cashier	Hand-Off	Call out name/number, hand to customer	10	Confirm order accuracy
			Total Estimated Time	120	≈ 2 min

Workflow Management : Rooted Veggie Grain Bowl

Step	Role	Station / Task	Action Description	Duration (sec)	Notes
1	Cashier	Order Taking	Take order, mark ticket, process payment	30	Encourage quick decisions
2	Runner	Garnish Station	Portion pickled onions and peanuts into bowl	20	Prepped earlier
3	Cook	Rice Station	Scoop hot spiced rice into bowl	25	Hot hold ≤4 hrs
4	Cook	Beans & Plantains Station	Add cooked beans and fried plantains	25	Beans cooked daily
5	Runner	Sauce Station	Spoon tomato groundnut sauce over bowl	15	Sauce prepped up to 5 days
6	Cashier	Hand-Off	Call number/name and hand to customer	10	Check order completeness

Workflow Management : Chicken Corn Mayo Bowl

Step	Role	Station / Task	Action Description	Duration (sec)	Notes
1	Cashier	Order Taking	Take order, mark ticket, process payment	30	Use visible order queue
2	Runner	Sauce & Veg Station	Drizzle garlic mayo base in bowl; prep toppings	20	Weekly sauce prep
3	Cook	Rice Station	Scoop rice and place in bowl	25	Keep hot
4	Cook	Chicken & Veg Station	Add grilled chicken, roasted roots, roasted corn	30	Daily prep
5	Runner	Final Assembly	Add finishing drizzle of garlic mayo	15	Target total ≤ 2 min
6	Cashier	Hand-Off	Call name/number, hand to customer	10	Confirm order accuracy
			Total Estimated Time	130	≈ 2 min 10 sec

6. Food Truck Operations : from set-up to licensure & hygiene

Truck Set-up and Daily Routine : Pre-opening checklist (sanitization, stock prep, equipment check)

Category	Key Focus	Rwanda Context
Sanitization	Dust control, pest prevention, power-out spoilage	Kigali's warm, open-air environment
Stock	Fresh daily market supply	Refrigeration not always reliable overnight
Equipment	Generator, LPG, insulated coolers	Needed due to infrastructure variability
Power	Generator + battery backup	Street grid access limited
Gas	LPG widely available, regulated	Leak checks essential
Water	Onboard tanks, regular cleaning	Municipal water reliable but storage hygiene critical

Truck Set-up and Daily Routine : Sanitization (1)

Task	Rwanda-Specific Notes	Frequency
Surfaces & Counters	Use locally approved chlorine solution to sanitize prep tables, serving ledges, rice stations.	Daily
Utensils & Cookware	Use 2–3 basin system (wash, rinse, sanitize) if no running water.	Daily
Refrigerators / Coolers	Check temperature daily due to power outages. Discard spoiled perishables.	Daily
Sinks & Water Lines	Flush lines daily to avoid stagnant water.	Daily
Floors & Drains	Sweep & mop thoroughly to reduce pests and dust.	Daily
Waste Bins	Clean daily, keep lids on tightly to prevent flies.	Daily
Pest Check	Inspect corners and food storage for insects or rodents.	Daily

Truck Set-up and Daily Routine : Stock Preparation (2)

Category	Rwanda-Specific Task	Frequency
Dry goods	Check for pests & humidity damage; store sealed with moisture absorbers.	Daily
Fresh ingredients	Buy same-day from markets; wash thoroughly.	Daily
Proteins	Transport in insulated coolers with ice packs; refrigerate immediately.	Daily
Sauces	Prepare in batches; store in fridge or cool box; lasts 1–2 weeks.	Daily/Weekly
Packaging	Stock extras since deliveries can be delayed; keep dry.	As needed
Backup stock	Keep extra LPG, bottled water, rice, and seasonings.	Weekly

Truck Set-up and Daily Routine : Equipment Check(3)

Equipment	Rwanda-Specific Checks	Frequency
Fridges / Freezers	Check temperature using thermometer; keep frozen water bottles inside.	Daily
Cooking appliances	Use LPG + portable burners; check hoses and connectors daily.	Daily
Generator	Fill tank in morning; check oil; keep backup fuel.	Daily
Water tanks	Fill with municipal water; clean tanks weekly; flush lines.	Daily/Weekly
POS / Cash systems	Ensure MomoPay phone and POS are charged; have backup battery.	Daily

Inventory Management

Item Type	Examples	Storage	Frequency	Source	Responsible
Fresh produce (vegetables)	Spinach/greens, carrots, cabbage, bean sprouts, mushrooms	Refrigeration / insulated coolers	Daily (early morning)	Local vendors	Runner / Prep Staff
Proteins (eggs, meat)	Beef, chicken, eggs	Refrigerated / insulated transport; ≤4 °C	Daily or every 2 days	Trusted butcher / cold vendor	Cook / Manager
Sauces / Condiments	Gochujang mix, soy blends, sesame oil	Refrigerate after opening; squeeze bottles for service	Weekly	Imported stock / specialty store	Manager
Dry goods	Rice, soy sauce, gochujang, sesame oil, paper packaging	Dry shelves, cool area; seal after opening	Weekly	Wholesale or imported	Manager
Packaging	Bowls, lids, napkins, gloves	Dry shelves; keep sealed from dust	Weekly / biweekly	Local suppliers	Cashier / Floater
Beverages / Extras	Water, soft drinks	Dry storage or coolers	Weekly	Wholesale	Cashier / Floater

Local Licensing

Step	Description	Authority / Document	Key Notes
1. Register the Premises	Submit application for registration with Rwanda FDA, including ownership or lease documents, location info, and layout plans.	Rwanda FDA — Guidelines for Registration & Licensing of Food Premises	For mobile food trucks, specify vehicle, route, and parking locations clearly.
2. Obtain License to Operate	Once registered, apply for a Food Premises License.	Rwanda FDA	License typically valid until June 30 of the following year; renew annually.
3. Inspection & Compliance	Premises inspected by Rwanda FDA inspectors for hygiene, layout, equipment, staff health, etc.	Rwanda FDA / Good Manufacturing Practices (GMP) Guidelines	Truck must meet hygiene, layout, equipment, and staff standards equivalent to fixed premises.
4. Ongoing Regulatory Compliance	Comply with periodic inspections, food product registration, labeling, hygiene standards, and fee payments.	Rwanda FDA / Food Hygiene Regulation	Keep licenses current and records available during inspections.

Local Licensing : Special Considerations for Food Trucks vs Fixed Restaurants

- Some of the premises-based regulations assume fixed buildings; you'll need to **adapt mobile premises** rules to a truck setup (e.g. proper sealing, mobility, secure storage).

- The hygiene rules for layout, ventilation, construction still apply — your vehicle must meet equivalent standards.

- Inspections might demand that your truck be parked in a fixed inspection location for compliance checks.

On-truck SOP Checklist

Task	Frequency	Responsible	Notes
Bin sorting & lining	Daily	Runner	Lids on at all times; use liners
Waste collection	Daily / scheduled	Manager	Use approved collectors; keep receipts
Sanitation open checklist	Before service	All staff	Check soap, sanitizer, thermometers
Sanitation close checklist	After service	All staff	Mop, dump greywater legally, sign logs
Records filing	Daily	Cashier / Manager	File waste, temp, cleaning logs in folder

Food-truck Sanitation Rules

Area	Key Requirements	Truck Implementation
Water & Drainage	Use potable water, separate grey tanks	Weekly tank cleaning; avoid cross-connection
Cleaning & Disinfection	Daily sanitizing of surfaces, equipment, utensils; maintain cleaning logs	Use food-grade sanitizer & schedules
Equipment & Layout	Smooth, easy to clean, stainless surfaces	Seal gaps; ensure proper ventilation
Staff Hygiene	Handwashing SOP, uniforms, exclude ill staff	Keep medical/fitness certificates
Temperature Control	Cold ≤4 °C, Hot ≥60 °C; use thermometers	Maintain daily logs for inspection

Waste Disposal

Category	Actions	Rwanda-Specific Notes
Sorting	Color-coded bins (organic, recyclables, residuals)	Mandatory source sorting under Rwandan regulations
Collection	Use approved waste collectors; keep receipts	Required for inspections by local authorities
Organic Waste	Double-bag, remove daily; consider compost partners	No overnight storage on truck
Used Oils	Collect in sealed container, hand to licensed handler	No pouring into drains; regulated
Plastics	Use paper/reusable packaging	Strict controls on thin plastic bags
Litter	Provide customer bins, clear signage	Street littering fines apply

7. Food Safety and Emergency Protocols

Food Safety Guideline

Area	Guideline	Description / Examples	Frequency	Responsible
Personal Hygiene	Handwashing	Wash hands before prep, after raw handling, after restroom	Always	All Staff
Temperature Control	Hot holding ≥60 °C, Cold ≤4 °C	Rice in hot box, sauces chilled	Throughout service	Cook / Runner
Cross-Contamination	Separate tools for raw chicken vs veggies	Use color-coded boards & tongs	Always	Cook
Cleaning & Sanitizing	Wipe stations with sanitizer	After each batch & end of shift	Daily	Runner
Ingredient Storage	FIFO (First In First Out)	Label containers with prep dates	Daily	Manager
Allergen Handling	Clearly label sauces (e.g., peanuts, egg)	Use separate spoons for sauces	Always	Runner
Waste Disposal	Use color-coded bins, empty daily	Keep lids closed, remove organic waste daily	Daily	All Staff
Documentation	Temperature & cleaning logs	Keep in binder on truck	Daily	Manager

Emergency Protocols

Scenario	Action Steps	Who Leads	Notes
Power Outage	1. Switch to generator if available. 2. Monitor food temps. 3. Discard food above 4 °C after 2 hrs.	Manager	Keep thermometers ready
Gas Leak	1. Turn off main valve. 2. Evacuate staff. 3. Call emergency services.	Manager	No open flames
Fire	1. Use fire extinguisher (Class K for grease). 2. Evacuate. 3. Call emergency services.	Manager / Cook	Train all staff
Foodborne Illness Complaint	1. Stop serving suspected dish. 2. Record details. 3. Notify health authorities.	Manager	Keep complaint log
Worker Injury	1. Administer first aid. 2. Call medical help if needed. 3. File incident report.	Manager	First aid kit on board
Water Supply Failure	1. Stop food prep. 2. Use stored potable water for handwashing. 3. If prolonged, suspend service.	Manager	Keep 20L emergency supply
Vehicle Breakdown	1. Move truck off-road if safe. 2. Secure food & power. 3. Notify operator & customers.	Manager	Emergency contact list onboard

Thank you!

Murakoze!
